

Protect Your **Digital Life**™

Protect Your

Privacy

We remove sensitive personal information from Internet Data Brokers, perform dark web searches for exposed personal credentials, and implement privacy settings to protect against data leakage and identity theft.

Protect Your

Home

We perform penetration testing and regular scans of your home networks to detect compromised networks, weak cybersecurity, BotNets and other security issues, and to prevent decisions children and family make online from resulting in a compromise.

Protect Your

Devices

We monitor and secure your personal devices, including cell phones, tablets and computers, using the same enterprise-grade tools used to secure corporate networks and devices.

Protect Your

Peace of Mind

With BlackCloak as your trusted partner, you'll protect what matters most and have control over managing your cybersecurity and privacy risk – and your personal advisor will always be just a call, tap, or text away.

Concierge Cybersecurity & Privacy™

A holistic program built on a comprehensive platform to protect your reputation, your finances, and your family.
